

HEALTH PROMOTOR FREQUENTLY ASKED QUESTIONS

PLEASE VISIT THE MEMBER FAQ WEBPAGE HERE (COMING SOON!)

This will include information about member eligibility and more.

HEALTH PROMOTOR OPERATIONS

Who can access the Vic Kids Eat Well database?

Only registered Vic Kids Eat Well Health Promoters will be given access to the Vic Kids Eat Well database and not participants themselves. Health Promoters are responsible for recording data and evidence on behalf of participants.

How will Health Promoters be notified when an organisation registers in their area?

Health Promoters will receive an email when they have been assigned to a new organisation in their area to support – the Vic Kids Eat Well management team will send an introductory email to the organisation and Health Promoter. More information about the organisation will be available on the database. The Health Promoter can then organise an introductory meeting with the organisation.

Can more than one Health Promoter be assigned to support an organisation?

Yes, more than one Health Promoter can be assigned including Health Promoters from different organisations. There is an option on the [member registration form](#) to indicate which Health Promoters are to be assigned, and if there are multiple Health Promoters in your organisation supporting the same organisation type, all Health Promoters can be assigned. Please email vickidseatwell@cancervic.org.au with any queries.

ENGAGEMENT WITH ORGANISATIONS

What engagement activities are recommended?

There will be a range of promotional activities by the Vic Kids Eat Well management team to generate interest and uptake in the movement. Health Promoters are also encouraged to do local community engagement in their areas – please refer to the Health Promoter Guide for ideas.

Does the Health Promoter provide ongoing support once an organisation has completed Vic Kids Eat Well?

Vic Kids Eat Well is designed to provide organisations with simple, achievable steps to get them started on their healthy eating journey. Once they have completed all applicable actions in Vic Kids Eat Well, an important aspect of the Vic Kids Eat Well process is the connection to the Achievement Program and/or Healthy Eating Advisory Service.

Outside school hours care (OSHC) and sports clubs are a new setting for my organisation. How do I support these settings?

More information about supporting these organisations is available on the dedicated Health Promoter resources page, which Health Promoters can access upon registration.

VIC KIDS EAT WELL SUPPORTERS

What is Smile Squad and how does it support Vic Kids Eat Well?

Smile Squad is a Victorian Government program that will provide free dental care to all Victorian public primary and secondary school students. It's rolling out across Victoria now. You can access the roll out plan via the [Smile Squad website](#).

Schools participating in Smile Squad will be encouraged to join Vic Kids Eat Well as part of the whole-school approach to oral health promotion. All schools participating in Smile Squad receive a letter, which includes information on Vic Kids Eat Well and encourages schools to join. Vic Kids Eat Well is also highlighted in the Smile Squad toolkit, which is provided to all participating schools, encourages schools to join and highlights the link between Vic Kids Eat Well actions and oral health promotion.

How is the Department of Education and Training (DET) supporting Vic Kids Eat Well?

DET is a partner of Vic Kids Eat Well and will be promoting Vic Kids Eat Well via their channels.
